

Fearless Makers

Tape Seam Guide

Materials

Roll of masking tape - about 3/4" (2 cm)

Equipment

X-acto knife or utility knife or box cutter

Instructions

Beware! - The masking tape will not be usable for much else. Use an old or inexpensive roll.

Draw lines to section off a distance of about 1" (3 cm) minimum.

Use your knife to cut through several layers of the tape to make one hunk. You want a piece with a minimum depth of 1/16" (1.5 mm).

Pull off the hunk of tape and use on the plate of the machine as a guide.

The guide will not harm your machine and works very well in assisting you to keep your fabric straight when sewing. It can be pulled off and repositioned many times.
